LAA Engineering advice to buyers:

**AIRCRAFT APPROVED?** Members and readers should note that the inclusion of all advertisements in the commercial or classified sections of this magazine does not necessarily mean that the product or service is approved by the LAA. In particular, aircraft types, or examples of types advertised, may not, for a variety of reasons, be of a type or standard that is eligible for the issue of a LAA Permit to Fly. You should not assume that an aircraft type not currently on the LAA accepted type list will eventually be accepted.

**IMPORTED AIRCRAFT?** Due to unfavourable experiences, the purchase and import of completed homebuilt aircraft from abroad is especially discouraged.

**TIME TO BUILD?** When evaluating kits/designs, it should borne in mind that technical details, performance figures and handling characteristics are often quoted for a factory-produced aircraft flying under ideal conditions. It is wise, therefore, to seek the opinion of existing builders and owners of the type. You should also take your own skill and circumstances into consideration when calculating build times. The manufacturer's build time should be taken as a guide only.

**AMATEUR BUILDING** All LAA aircraft builders and potential builders are reminded that in order to qualify for a LAA Permit to Fly, homebuilt aircraft must be genuinely amateur built. For these purposes the CAA provide a definition of amateur built in their publication CAP 659, available from LAA. An extract from CAP 659 reads "The building and operation of the aircraft will be solely for the education and recreation of the amateur builder. This means that he would not be permitted to commission someone else to build his aircraft". An aircraft built outside the CAA's definition could result in an expensive garden ornament.

**Here I am (AGAIN)**  
**PPL Ground Exams**  
 DEREK DAVIDSON

Are you trying to pass by watching television (er, sorry, CD ROMs)?

Clare and I could teach you more in one day, by talking to you, than you could learn by watching TV (er, sorry, CD ROMs), until your eyes fall out.  
 Five day, full-time Ground School at our home, all seven exams, and I promise you will enjoy it.  
 Come down and do any or all the exams you need. Go back to your wife and school and get on with your life, you know what I mean!  
 Three decades a teacher/examiner
