# SYWELL 2019

## SPEAKERS CORNER *Welcomes*

Rob Hart

Friday 12.00 to 13.00

SkyDemon  
'Tips & Tricks'

At a recent 'Aviation Oriented' seminar attended by quite a number of sports aviation 'representatives', one asked the group. "How many people attending used SkyDemon?" .... Everybody put their hands up! When we spoke about this to Rob Hart – SkyDemon's first 'employee' - he wondered how many of the users understood all the features inside the package?

SkyDemon is a privately owned UK company making fine planning and navigation software designed to make VFR easier and more fun. Rob Hart was the first employee at SkyDemon, and has been with the company for 9 years.

This 'tips and tricks' seminar aims to demonstrate the intended workflow of the software as well as highlight some lesser known features. Bring your tablet and follow along to learn how to squeeze even more value out of SkyDemon for your flying.
